DO YOU KNOW WHAT'S IN YOUR AIR?

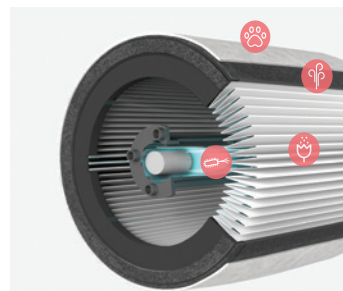

Indoor air may be dirtier than you think. There are many pollutants that may negatively impact the air quality in your home. Studies have indicated indoor air quality may be as much as 2 to 5 times worse than outdoor air, and many people spend up to 90% of their time indoors. Most air purifiers don't measure air quality or provide feedback. This may leave you wondering if purified air is actually being delivered throughout the room. TruSens™ air purifier promotes cleaner air with remote sensing technology, real time feedback, DuPont® filtration and a proprietary bi-directional airflow. There are many things in life that are out of your control. The air you breathe should not be one of them.

Features & Benefits

SensorPod Air Quality Monitor

Clean air should be everywhere, not just near the purifier. Placed across the room, SensorPod™ measures pollutants away from the purifier, then communicates with the purifier to ensure the full room benefits from purified air.

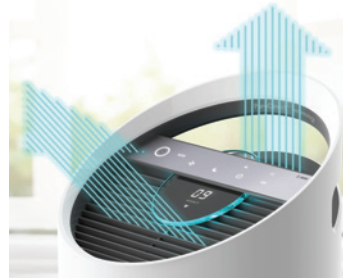

360 degree DuPont™ filtration

Captures pollutants such as allergens, VOC gases and microscopic particles. UltraViolet Sterilization destroys germs and viruses that can build up on the filter, preventing re-circulation of live germs.

Air Quality Indicator

SensorPod™ air quality readings are displayed on the illuminated disc. Know when your air is good, moderate or poor and have the peace of mind that your purifier responds accordingly.

PureDirect Technology

PureDirect™ proprietary technology splits clean air into two streams. It delivers purified air comfortably and efficiently throughout the room.

Model	Z-1000	Z-2000	Z-3000
Air Inlet	360°	360°	360°
Room Coverage [Air changed 2 times per hour]	250 sq ft / 23 sq m	375 sq ft / 35 sq m	750 sq ft / 70 sq m
Air Delivery Type	PureDirect™	PureDirect™	PureDirect™
